"Ana D'Apuzzo Collezioni" is the result of a combination of hand work and different interdisciplinary modern technologies, such as 3D Body Scanning, 3D architectural modeling, 3D visualization, and digital printing. Textile design and the dresses design and realization are the work of author Ana D'Apuzzo. The result of this creative process is a complex, multi-layered graphics applied on the silk material with a unique process of printing on textiles. The graphics alone is often called "personalized" because it is derived from a three-dimensional character - scan of the person who wears clothes. The colors that dominate the collection are neon green, red and black. The neon colored clothing exudes specific sensibility and certainly remains observed.
